Summary

Motivated Computer Engineering student with a strong foundation in Software Development, Data Structures, and Cybersecurity. Proven ability in Python, AWS, and Machine Learning for creating efficient, reliable solutions. Eager to leverage academic knowledge and practical skills in a challenging IT environment, focusing on innovative projects and emerging software architectures.

PROFESSIONAL EXPERIENCE

Technical Support Advisor | Concentrix – Bangalore Urban, Karnataka, India (On-site) Dec 2025 – Present

- Specialize in delivering comprehensive Technical Support for Windows OS and Office 365 environments.

Full Stack Developer Intern | INVEZORO – Hyderabad, Telangana, India (Remote) Apr 2025 – Oct 2025

- Collaborated with a cross-functional team of developers and testers to build responsive web applications.
- Architected dynamic front-end interfaces using React.js and robust, scalable back-end logic with Node.js and Express.
- Managed the technical integration of LMS portals (Moodle and Canvas) using REST APIs and LTI protocols to automate user enrollment and synchronize real-time learning analytics.
- Designed and optimized relational (PostgreSQL) and non-relational (MongoDB) database schemas to ensure high data integrity and reduced query latency.
- Utilized Git for version control within an Agile framework, participated in code reviews, and implemented automated testing to deliver production-ready software.

EDUCATION

B.Tech, Electronics and Computer Engineering

Year: 2020-2025

AMRITA VISHWA VIDYAPEETHAM

HSC (Intermediate), Physics, Chemistry, & Mathematics

Year: 2020

Narayana Junior College

SSC

Year: 2018

Narayana EM High Schol

PROJECTS

Real-Time Global Machine Health Dashboard

- Focus: Full-Stack Development, Real-Time Data Synchronization, Security.
- Enhanced a secure, single-page Dashboard to monitor 36 machines across 4 factories in real-time, providing immediate status alerts.
- Implemented Firebase Firestore real-time listeners and JavaScript for live data synchronization and configured Firebase Custom Token Authentication for secure intranet access.
- Used Tailwind CSS for the user interface.

Virtual Voice Assistant (Jenny)

- Focus: Python, NLP, Machine Learning, API Integration.
- Designed and enhanced a full-featured Virtual Voice Assistant using Python, NLP, and Machine Learning.
- Engineered robust Natural Language Understanding (NLU) and integrated APIs for smart home platforms to improve user productivity and device control.

Brain Tumour Detection

- Focus: Machine Learning, Classification, Python.
- Built a classification system in Python to identify brain MRI images as either containing a tumour or not.

Music Generation Using Genetic Algorithm

- Focus: AI/ML, Genetic Algorithms.
- Leveraged evolutionary principles (genetic operations and fitness evaluation) to create diverse musical compositions.

SKILLS

Cloud & Architecture: AWS | Solution Architecture | Cloud Cost Management | System Architecture

Technical & Architecture: Software Development | DSA | DBMS | IOT | AIML | Solution Architecture | AWS | Formal Communication | Root Cause Analysis | Troubleshooting | Quality Assurance | Data Structures

Cybersecurity & Identity: Identity Management | Identity Management Assessment | Identity Management Design | Process Analysis | Quality Assurance

AI/ML & Data Science: Machine Learning | Deep Learning | Generative AI | Natural Language Processing | Data Science | Data Analytics | Agentic AI

Languages: Python | C/C++ | SQL | JavaScript | HTML & CSS | MATLAB

Tools & Workflow: Google Colab | Jupyter Notebook | Git | VS Code | GitHub | Pycharm | Automation Tools | LangSmith | Pandas | NumPy | Matplotlib | Scikit-learn | LangChain | CNN | RNN | NLTK | PyTorch | TensorFlow | Keras | Streamlit

Analytical & Critical Thinking: Problem-solving | Critical Thinking | Data Analysis | Statistical Analysis | Strategy Evaluation | Process Analysis

Project & Process Management: Strategic Planning | Project Planning | Process Management | Team Leadership | Time Management | Decision making | Multi-tasking

Communication & Collaboration: Communication (Verbal & Written) | Teamwork and Collaboration | Formal Communication | Observation | MS Office

CERTIFICATIONS & JOB SIMULATIONS

AWS APAC Solutions Architecture Virtual Experience (Forage)

- Designed a simple and scalable hosting architecture based on Elastic Beanstalk for a client experiencing significant growth.

Deloitte Australia Technology Job Simulation (Forage)

- Completed full-stack development simulation, engineering a secure Machine Health Dashboard, and quantified the project scope by specifying a 240-man-hour estimate and 6-week timeline.

Tata Cybersecurity Security Analyst Job Simulation (Forage)

- Completed simulation focusing on Identity and Access Management (IAM) principles and strategic alignment of security practices.

Python Data Structures (Coursera, University of Michigan)

- Mastered core Python data structures for efficient storage and data retrieval in complex analysis.

The Structured Query Language (SQL) (Coursera)

- Gained expertise in SQL syntax; wrote complex analytical queries using aggregate functions and multi-table JOIN operations.

Introduction to Cybersecurity Essentials – Coursera)

- Established foundation in cybersecurity principles including the CIA Triad and common threats (phishing, malware).
 - Applied secure digital hygiene, focusing on MFA, strong password management, and secure device configuration.
 - Understood the implementation and use cases of encryption to protect data in transit and at rest.
-

EXTRA-CURRICULAR ACTIVITIES / LEADERSHIP

- CO-Secretary of The Squad, The Adventure and Patriotic Club
2021-2023
 - Sr Executive of Vedanta Club,
2021-2023
 - Sr Executive of Prakriti Club
2021-2023
-

PUBLICATIONS

Virtual Voice Assistant (Jenny): Enhanced an AI-powered virtual voice assistant with natural language processing, task management, and smart device integration, Developed to streamline daily tasks and enhance user productivity.
